

Supplementary Information

Supplemental Table 1. Linguistic Style Matching between Groups.

Variable	LLM to High AI Literacy Group – Means (SD)	LLM to Low AI Literacy Group – Means (SD)	Low to High AI Literacy Group – Means (SD)
Linguistic Style Matching	0.66 (0.14)	0.67 (0.14)	0.69 (0.13)

Supplemental Table 2. Means and standard errors by group with 95% CI.

Pronoun	Group	Week	M	SE	Lower CI	Upper CI
i	LLM	1	0.314	0.054	0.207	0.42

Supplemental Table 3. Main Effect between Groups for Pronouns with students with high AI literacy as reference.

Parameter	β	SE
Self-referential singular pronouns ('i')		
Students with Low AI Literacy	0.12	0.09
LLM	0.15	1.0

Self-referential plural pronouns ('we')		
Students with Low AI Literacy	0.01	0.06
LLM	-0.01	0.02
Second person referential singular pronouns ('you')		
Students with Low AI Literacy	-0.02	0.08
LLM	0.35	0.07
Third person referential plural pronouns ('they')		
Students with Low AI Literacy	0.16	0.12
LLM	-0.40	0.50
Third person referential singular pronouns ('she/he')		
Students with Low AI Literacy	0.08	0.19
LLM	-0.50	0.88
Impersonal Pronouns		
Students with Low AI Literacy	0.14	0.24
LLM	-0.90	1.12

Supplemental Table 4. Main Effect between Groups for Pronouns with Between- and Within-Person Differences. Students with high AI literacy as reference.

Parameter	β	SE
Self-referential singular pronouns ('i')		
Between Person Means	1.10	0.54
Within Person Means	-1.02	0.26
Students with Low AI Literacy	-0.001	0.06
LLM	-0.02	0.05
Self-referential plural pronouns ('we')		
Between Person Means	0.80	0.06

Within Person Means	-0.11	0.03
Students with Low AI Literacy	0.01	0.04
LLM	-0.007	0.03
Second person referential singular pronouns ('you')		
Between Person Means	0.81	0.1
Within Person Means	0.0006	0.03
Students with Low AI Literacy	-0.008	0.08
LLM	0.14	0.08
Third person referential plural pronouns ('they')		
Between Person Means	1.0	0.06
Within Person Means	-0.04	0.03
Students with Low AI Literacy	-0.03	0.08
LLM	-0.04	0.07
Third person referential singular pronouns ('she/he')		
Between Person Means	0.97	0.06
Within Person Means	-0.18	0.03
Students with Low AI Literacy	-0.13	0.12
LLM	-0.05	0.10
Impersonal Pronouns		
Between Person Means	1.03	0.06
Within Person Means	-0.08	0.03
Students with Low AI Literacy	0.15	0.15
LLM	0.14	0.14

Supplemental Table 6. AIC and BIC values for each model: (1) Main effect of groups and time only, (2) Main effect of groups and time with main effect of between and within persons, (3) Main and interaction effects of groups and time with between and within person variables. Model 3 was selected due to lowest AIC and BIC.

Variable	Model	AIC	BIC
i	Group Only Main Effect	3836.49	3863.14
i	Group with Between and Within Persons Main Effect	3591.31	3633.38
i	Group with Between and Within Persons Main and Interaction Effects	3562.07	3614.66
we	Group Only Main Effect	2854.36	2881.1
we	Group with Between and Within Persons Main Effect	2339.58	2381.65
we	Group with Between and Within Persons Main and Interaction Effects	2308.1	2360.69
you	Group Only Main Effect	4792.09	4818.83
you	Group with Between and Within Persons Main Effect	4309.72	4351.8
you	Group with Between and Within Persons Main and Interaction Effects	4282.57	4335.16
they	Group Only Main Effect	4749.19	4775.93
they	Group with Between and Within Persons Main Effect	4264.95	4307.02
they	Group with Between and Within Persons Main and Interaction Effects	4244.55	4297.14
she/he	Group Only Main Effect	6110.14	6136.88
she/he	Group with Between and Within Persons Main Effect	5446.37	5488.44
she/he	Group with Between and Within Persons Main and Interaction Effects	5408.9	5461.49
Impersonal pronouns	Group Only Main Effect	6796.4	6823.14
Impersonal pronouns	Group with Between and Within Persons Main Effect	5920.57	5962.64

Impersonal pronouns	Group with Between and Within Persons Main and Interaction Effects	5900.49	5953.08

Supplemental Table 6. Meta AI Literacy Scale (MAILS) Short-Form (11-point Likert scale)

1. I can use artificial intelligence meaningfully to achieve my everyday goals.
2. I can assess what advantages and disadvantages the use of an artificial intelligence entails.
3. I can tell if I am dealing with an application based on artificial intelligence.
4. I can weigh the consequences of using AI for society.
5. I can design new AI applications.
6. I can program new applications in the field of "artificial intelligence".
7. I can usually solve strenuous and complicated problems related to working with artificial intelligence well.
8. Although there are often new AI applications, I manage to always be "up-to date".
9. I can prevent an AI from influencing me in my everyday decisions.
10. I can handle it when everyday interactions with AI frustrate or frighten me.

Per MAILS scale development, AI literacy was a the aggregate score calculated from Items 1 (Detect AI), Item 7 (Apply AI), Item 10 (Understand AI), Item 5 (AI Ethics).
